CHAPTER 10	STRUCTURAL GEOMORPHOLOGY	170-184
	Geomorphic expressions of structural structure; topographic expressions of fault structure (fold geomorphology); topographic expressions of folded structure (fold geomorphology); expression of relief; fluvial cycle of erosion on folded structure; topographic expressions of domed structure; fluvial cycle of erosion on domed structure.	
CHAPTER 11	PLATE TECTONICS	185-199
	Meaning and concept; plate margins; palaeomagnetism-source of geomagnetic field; remanent magnetism; reconstruction of palaeomagnetism; reversal of polarity; sea floor spreading; plate motion; causes of plate motion; plate tectonics and continental drift; plate tectonics and mountain building; plate tectonics and volcanicity; plate tectonics and earthquakes.	
CHAPTER 12	VULCANICITY AND LANDFORMS	200-215
	Concept of volcanicity; components of volcanoes; classification of volcanoes; volcanic types; world distribution of volcanoes; mechanism and causes of volcanism; hazardous effects of volcanic eruptions; topography produced by volcanicity; geysers; fumaroles.	
CHAPTER 13	MOUNTAIN BUILDING	216-240
	Introduction; classification of mountains; block mountains; folded mountains; geosynclines; theories of mountain building; geosynclinal theory of Kober; thermal contraction theory of Jeffreys; sliding crustal mass theory of Daly; thermal contraction current theory of Holmes; radiactivity theory of Joly; plate tectonic theory.	
CHAPTER 14	WEATHERING AND MASSMOVEMENT	247-268
	Meaning and concept; controlling factors of weathering; types of weathering processes; physical weathering; chemical weathering; biological weathering; geomorphic importance of weathering; mass-movement and mass-wasting; meaning and concept; classification of mass-movements; factors of mass-movements; slides; falls; flows; creep.	
CHAPTER 15	HILLSLOPE	267-296
	Classification of slopes; slope elements; approaches to the study of slope development-slope evolution approach and process-form approach; geomorphic concept and poly-process concept; slope decline theory of Davis; slope replacement theory of Penck; A. Wood's model of slope evolution; hillslope cycle theory of L.C. King; concept of R. A. Sauer; Fisher-Lahmann model of slope evolution; process-response model of A. Young; slope failure; hillslope processes and erosion.	
CHAPTER 16	CYCLE OF EROSION, REJUVENATION AND POLYCYCLIC RELIEFS	297-307
	Origin and evolution of the concept; geographical cycle of Davis; Penck's model of cycle of erosion; normal cycle of erosion; interruption in cycle of erosion; rejuvenation; topographic expressions of rejuvenation and poly (multi) cyclic reliefs.	
CHAPTER 17	DESADATION CHRONOLOGY, EROSION SURFACES AND PENEPLAINS	308-323
	Meaning and concept; erosion surfaces—meaning; identification of erosion surfaces; dating of erosion surfaces; erosion surfaces of Chotanagpur highlands; desadation chronology of peninsular India.
